

Assistance to foreign groups

You are an international group. You wish to set up operations in France or already have a subsidiary or a branch here. You seek assistance of competent professionals with a thorough grasp of all legal, social, accounting and fiscal specificities of a structure this type.

YOUR CONCERNS

-  Your initial aim is to find a reliable partner, always on call, fluent in English / German / Italian and who has the essential personal connections with international professional organizations.
-  You consider delegating to this partner the coordination of the "administrative" relation between your French entity and the parent company, your payroll and Human Resource administration as well as the relation with the French tax authorities.
-  You need to have regular and accurate accounting measures that will enable you to monitor your activity in France, within the scope of the objectives and constraints imposed by the group.

WHAT WE OFFER

-  Even before you set foot in France, we help you in **drawing up your business plan and choosing the appropriate legal structure**, in association with our partner law firms.
-  Should you need to set up a global information system shared with the rest of the group, we help you **draw your chart of accounts** to comply with local regulations (mapping of company statutory accounts with group management accounts).
-  We handle the details of **secondment and expatriation contracts** or simply the employment contracts of your French staff, in accordance with the requirements of your mother company. We also assist your employees with their personal tax returns, especially when tax residency is an issue.
-  We produce all your **corporate tax returns** and our services are also available to the group's foreign subsidiaries that need assistance with recovery or handling of their French VAT.
-  We handle **bookkeeping and financial statements preparation** as well as monthly **management accounts reporting** in the group format.

- ▶ If you are in the process of recruiting we can ensure a smooth transition with no loss of information by **seconding a member of our staff** to be immediately operational, on a full-time or part-time basis.

THE ADVANTAGES TO YOU

- Your interlocutors are all members of our International Department dedicated to foreign clients. Partners or staff, they speak a number of foreign languages. They will place at your disposal their knowledge of international accounting standards and international information systems acquired with major accountancy firms.
- The involvement of our partners in our **BKR International** association assures you an immediate reactivity in case of needs abroad.
- **Our offer is very flexible** and can be tailored to your needs at every stage of the evolution of your activity and of your business structure.
